Some stuff people are printing in my room over the internet / 2.0

Current status: **Waiting for submissions.** Come on, **print some stuff.** – STREAMING: ⦿ OFF
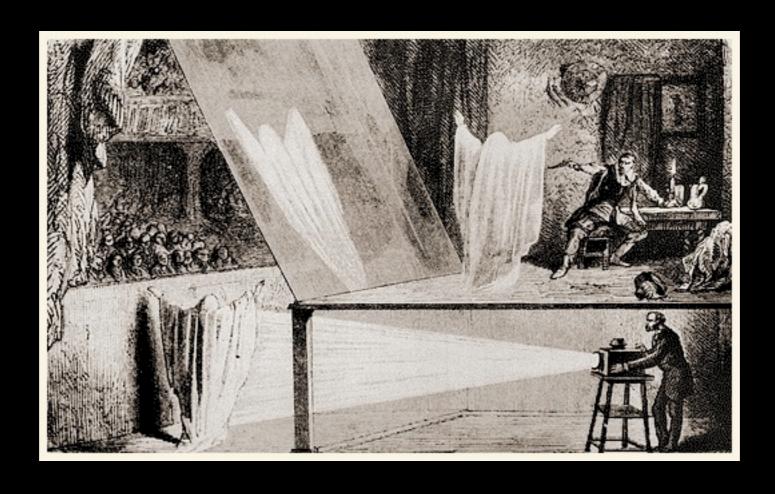

You are looking at my printer sending out stuff picked by some people on the internet. You can do that too, just fill in the form and click «Print». This stuff I'm collecting will eventually become a book.

➲ **Open form** and print some stuff

➲ How does it work?

technical challenges

- physical hardware

- screen brightness for reflection

- making nice clean package

- mobile web upload

questions

- do you still read physical books?

- would this make you feel connected to people in a unique way, either reading or sending?
