Inspiration

To create a tool to produce music visually
that is also: intuitive
                easy to understand
                attractive

To learn about music & computer music

Goals

Coming up with meaningful visual ways
to represent sound

Implementing the interaction to create
these visual representations

Working with and manipulating sound

Hurdles

Napkin Sketch

What are some ways to represent music visually?

What are some good libraries/resources for working with music and sound?

Questions
